

To: All Washington FSA Personnel  
From: H. E. Drew, State Director  
Subject: Health Services Available

Very few of us are fully informed in regard to the agencies offering health services in the state that might be of value and assistance to borrowers.

The Health Services Section has compiled the attached booklet listing the health service agencies and giving something of the activities and scope of each, so as to be of assistance to us.

You are requested to familiarize yourself with the agencies listed and their programs so that you will be able to refer borrowers for the assistance offered when appropriate.

We are all inclined to overlook the programs of the other agencies. The field covered by these programs is very broad and we should see that our borrowers are acquainted with them when they are in need of the services offered.

H. E. Drew

## Geological Notes

1. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It grows on  
humid rocks or talus and is probably  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

2-3. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

4. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

5. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

6. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those

of the Atlantic coast.

7. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

8. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

9. *Leptostomum* *lanceolatum* (L.) Schrad.  
This is a small, delicate plant, with a thin  
white midrib and no distinct midrib. It is  
adapted to habitats more sheltered than those  
described by Lindberg. It is a species  
of the Atlantic coast.

### THE PLACE OF VOLUNTARY AGENCIES IN THE FARM SECURITY ADMINISTRATION HEALTH SERVICE PROGRAM

Mr. Hudgens, Associate Administrator, stated "It is the responsibility of every FSA field employee to be the best informed agricultural leader in his county in the health service field. Utilize this knowledge in assisting farm families to secure better health services".

We have many state and other voluntary agencies that offer many health services to Washington FSA families at little or no cost to them. The following pages give the names of these agencies, their state representative, state headquarters address, the type of service they are in a position to render, to whom the case should be referred, the cost of the service and the area served. These agencies operate on public or private donations and are willing to serve the farm families in your community.

One of the chief barriers to providing farm families with better health is the lack of knowledge of existing facilities within the community that can be utilized by the families to improve their general health. You should acquaint yourself with the services that are offered by civic and private groups in your communities in order to stimulate the borrowers to take an active part in these health activities and utilize the services of these agencies. In some communities all of these services may not be available. In those instances many benefits can be received directly from the state organization. The distribution of health educational material will assist you materially in developing an interest and recognition by the families of better health practices and consequently will have a marked effect upon the communities which they are a part of.

Our contacts with the head of the state organizations have indicated to us that they are extremely anxious to make available to FSA families the services which are provided by their respective agencies. It is up to you to see that our families have an opportunity to properly use these services.

THE ADMINISTRATIVE AND FUNCTIONAL ORGANIZATION  
OF THE WASHINGTON STATE DEPARTMENT OF HEALTH

Dr. Arthur L. Ringle, Director  
1412 Smith Tower Building  
Seattle 1, Washington

STATE BOARD OF HEALTH

The State Board of Health shall have supervision of all matters relating to the preservation of life and health of the people of the State. The Board shall have supreme authority in the matters of quarantine; may declare and enforce it when none exists; may modify, relax or abolish it when it has been established. It may also make and enforce orders in local matters when, in the opinion of the State Board of Health, an emergency exists and the local Board of Health has neglected or refused to act with sufficient promptness or efficiency, or when no such local Board has been established; and all expenses so incurred shall be paid by the county, which services are rendered out of the general fund of said county.

The State Board of Health is composed of the Director of the State Department of Health and four other persons interested and experienced in the field of public health. All of these appointments are made by the Governor.

STATE DEPARTMENT OF HEALTH

The State Department of Health is responsible for carrying out the order of the State Board of Health and other responsibilities as delegated by the Legislature from time to time. However, a great majority of the activities of the State Department of Health are chiefly advisory and supervisory to local county and city health departments. The responsibilities of the State Department of Health may best be considered under the more basic Divisions.

A. Division of Preventive Medical Service

The Division is composed of the following sections:

1. Communicable Disease Control
2. Maternal and Child Hygiene and Crippled Children's Services
3. Industrial and Adult Hygiene
4. Mental Hygiene
5. Dental Hygiene

**Services:** Communicable Disease Control Section. This Section includes Tuberculosis Control, Venereal Disease Control, Acute Communicable Disease and Epidemiology, and the Public Health Laboratory.

(a) Tuberculosis Control Program. This program is interested in finding infectious cases of tuberculosis and isolating them in proper sanatoria. This is accomplished by clinics conducted by chest specialists, through mass x-ray by means of miniature films of selected groups of our population, with the intent of x-raying every individual in the State. Through this program the various tuberculosis hospitals throughout the State are offered financial assistance in hospitalization of active cases of tuberculosis.

Referrals: All requests for information should be made to the local department of health or anti-tuberculosis chairman.

Cost: None.

Area: State wide.

(b) Venereal Disease Control Program. This program is developed in the interest of finding infectious cases of venereal disease and placing them under prompt and adequate treatment. Rapid treatment centers in the State have been developed in this program.

Referrals: To local health office or private physician. All clinics for treatment are on regular days. Rapid treatment clinic located in Seattle.

Cost: There is no charge for treatment at clinics. Anti-syphilis drugs are furnished free by the State Health Department. Private physician will make an administrative charge.

Area: State wide.

(c) Acute Communicable Disease and Epidemiology. This program is charged with the responsibility of carrying out and enforcing the rules and regulations of the State Board of Health covering the spread of communicable diseases. It also gives assistance and guidance to local health departments in the diagnosis, method of spread and treatment of communicable diseases. The health department is interested in treatment only insofar as it is an effective means of preventing the spread of a disease to other members of the community. It may be definitely stated that only in instances where treatment forms the basis of prevention, does the health department engage in therapeutic medicine.

The State Laboratory service is for physicians and health officers in localities in the State where laboratory facilities are not available and for persons unable to obtain the services elsewhere.

The work consists of bacteriological and serological examinations of specimens and cultures for evidence of diseases which may be transmitted from one person to another - diphteria, dysentery, epidemic, meningitis, gonorrhea, scarlet fever, septic sore throat, syphilis, tuberculosis, tularemia, typhoid fever and undulant fever, and the examination of specimens from animals suspected of being infected with rabies, anthrax, glanders or other diseases communicable to man; also water, milk, shellfish and other foods are examined bacteriologically for dangerous contamination.

**Referrals:** Local County Health Department or attending physician.

**Cost:** There is no charge for treatment at the immunization clinics. However, such clinics are held during the period when immunization is necessary for the preventing of the spread of disease, otherwise the control is referred to the attending physician.

**Area:** State wide.

**Services:** Maternal and Child Hygiene and Crippled Children's Service. This Section is composed of the following programs:

- (a) Emergency Maternity and Infant Care Program. Here dependents of the four lower pay grades of military personnel are eligible for maternity and infant care, with the payment for such care being made by the State Department of Health to physicians and hospitals.
- (b) Maternity Home Licensing Program. Personnel of the State Department of Health inspect the various maternity homes and hospitals, not approved by the American College of Surgeons, for proper facilities and technics in the care of obstetrical cases and infants.
- (c) Maternity and Child Hygiene Program. This is interested in applying preventive medical measures to maternity cases and infant care. It is interested in the development of adequate prenatal, delivery and postnatal care for mothers, and health supervision of well babies, the preschool and school child.

(d) Nutrition Program. This program is interested in improving the nutritional status of mothers and children throughout the State.

(e) Rheumatic Fever Program. This has been developed on a demonstration basis for Spokane County. Here diagnosis, clinic supervision, and hospital treatment are offered as a part of the program, as well as supervision of its siblings, since Rheumatic Fever is a family disease.

(f) Crippled Children's Program. This program provides for diagnosis, clinic supervision, and treatment, including hospitalization for all children from birth to 21 years of age. By agreement, ordinarily the voluntary agencies (Children's Orthopedic, Shriners) handle children from birth to 14 years of age, and the State program handles all children from 14 to 21 years of age.

(g) Medical Social Service Program. This program requires the Medical Social workers to render direct service to Rheumatic Fever, Crippled Children and Maternal and Child Hygiene programs. Recently the services of a Medical Social worker consultant has been made available to a limited number of county health departments to do general medical social work consultation.

**Referrals:** All requests for information and assistance for any services should be referred to the local Health Department. If there is no representative in the county, write directly to the State Health Department.

**Cost:** None.

**Area:** State wide.

**Service:** Industrial and Adult Hygiene. The Industrial Hygiene Program offers medical consultation, industrial engineering, chemical, and sanitary consultation to industrial plants and labor groups throughout the State. In addition, it also offers industrial nursing consultation, and makes available public health education and other services of the State Department of Health to labor and management groups.

The Adult Hygiene program is not developed to any great degree at present, but it will provide for such programs as cancer control, heart disease and others, as time goes on.

**Service:** Mental Hygiene Section. This is a new section in the State Department of Health, and since August has been working on plans to establish psychiatric clinic services

to the State. A full-time clinic is in operation in Seattle with services available to adults, particularly veterans, and to children. It is anticipated that another full-time clinic will be set up east of the mountains with the remainder of the state serviced by mobile clinic units in which psychiatrist, psychologist and psychiatric social worker function as a team just as in the full-time clinic. Through the operation of these clinics on a demonstration basis, it is anticipated that communities will eventually take over this responsibility as an integral part of local health services.

Service: Dental Hygiene Section. The dental program has been reorganized and is now a Section within the State Department of Health. Advisory and consultant service will be available for community dental health program planning, professional education in dentistry for children, and to official, non-official agencies, and voluntary groups in the dental phases of the general health program.

Special emphasis will be placed on the need for maintenance dentistry for children, and preventive and restorative dentistry for adolescents and industrial workers.

Service: Public Health Statistics. The Public Health Statistics Section includes the vital statistics program, which is responsible for the filing of birth and death records for the State, and the issuance of certified copies of records. Registration activities are carried out in local areas through appointed registrars. In addition, this Section compiles and tabulates morbidity and mortality data on a state wide level.

Service: Public Health Education Section. This Section was organized in December, 1943, and is responsible for coordinating all public health educational activities conducted by the State Department of Health. These activities include: In-service professional education programs; publicity; library, visual aids and film loan library; and the preparation and distribution of printed educational materials. In addition, the Section assists in the coordination of the State Health Department public health education program with educational programs conducted by other State official and non-official agencies and lay groups.

As part of the consultation and advisory service to local health departments, the Section is responsible, also, for promoting the development of local community health education programs under qualified personnel.

Referrals: To the local Health Department or State Health Department.

Cost: None.

Area: State wide.

B. Division of Public Health Engineering

This Division has the responsibility for enforcement of the rules and regulations of the State Board of Health dealing with sanitation matters. The Division is composed of two Sections:

1. Sanitary Engineering Section
2. Environmental Sanitation Section

Services: Sanitary Engineering Section. This Section is responsible for supervision of all public water supplies, sewerage systems and sewage treatment plants, with respect to potability and adequacy of the water supply, operation efficiency of water or sewage treatment facilities, promotion of new water supplies, sewerage systems of sewage treatment plants, and the review and approval of all engineering plans and specifications in connection with these activities.

This Section is responsible for supervising the method of treatment and disposal for industrial wastes and the supervision of construction and operation of all public swimming pools and determining approvability of natural bathing areas. Also, the Section provides technical advice to communities to assist in establishment and operation of garbage and refuse collection and disposal systems.

Services: Environmental Sanitation Section. This Section furnishes administrative and technical advice and consultation to local health departments in matters related to the sanitary control of the production, processing and distribution of fluid milk, the sanitary control of eating and drinking establishments, private water supplies and sewage disposal systems, school and public building sanitation, private premise sanitation, insanitary nuisances and rodent control activities.

The Section supervises the sanitation of shellfish growing areas and processing and packing plants; supervises the enforcement of the State mattress and bedding laws; and supervises the State rodent control activities.

The Section cooperates with the Sanitary Engineering

Section in following up, through local health departments, recommendations for the operation of public water supplies, sewage collection and disposal systems and swimming pools.

Referrals: Local Health Department. If there are no representatives in the county write to the FSA regional office.

Cost: None.

Area: State wide.

### C. Division of Local Health Services

The Division is responsible for giving advice and consultation to local departments of health, for coordination of these consultation and advisory services and for presenting to the State Department of Health, the problems and needs of local areas throughout the State. It is further responsible for the stimulation and development of full-time health departments throughout the State.

All requests from local health departments will be routed through this Division and hence to other Divisions and Sections as indicated in the State Department of Health. All services rendered to local health departments will be planned through this Division.

The Division is composed of the following Sections:

1. Public Health Nursing
2. Field Consultation

Service: Public Health Nursing Section. This Section offers consultation and advisory services to public health nurses carrying on preventive programs in local county and city health departments. The public health nurse offers a direct means of carrying preventive medical information from the health department to the home. This Section also has supervision of all public health nurses in the State Department of Health and assigns them to the various Sections and Divisions.

Service: Field Consultation Section. This Section will be composed of a Head, well qualified and experienced in public health administration, a general advisory public health clerk, one or more general advisory sanitarians, and other necessary personnel who will be assigned from various Sections and Divisions. Personnel so assigned will be working in a general field, such as general public

health advisory nurses, general public health advisory sanitarians and others, and they will be responsible for their day to day activities in the local health departments to the Head of this Section, while responsible to the parent Section for technical information. From time to time personnel in special fields will be assigned to the Field Consultation Section to carry on special activities.

## STATE DEPARTMENT OF SOCIAL SECURITY

John W. Unis, M. D.

Medical Supervisor

State Department of Social Security

Olympia, Washington

**Services:** There is a department of public welfare in every county in the state. The department of public welfare or social security is organized into four divisions to be designated respectively: (1) Division of Public Assistance, (2) Division of Old Age Assistance, (3) Division for Children, (4) Division for the Blind.

1. Division of Public Assistance. The purpose of this Division is to provide support for relief of needy persons who do not have resources sufficient to provide themselves and dependents with food, clothing, shelter and such other items as are necessary to afford a reasonable subsistence. The amount of assistance to be granted in each individual case is determined on a budgetary basis taking into account the needs of the applicant and of persons responsible for care of the applicant. (Except in the case of applicants who have attained the age of 65 years.)
2. Division of Old Age Assistance. Old age assistance is being given under this act to any persons who have attained the age of 65 and whose incomes are less than \$360 per year and have been residents of the State of Washington for at least five years and are not an inmate of any public institution. The amount and nature of old age assistance which any person shall receive is determined by the Department of Welfare with due consideration to each applicant's resources. The act provides a minimum of \$40 monthly for senior citizens over the age of 65. In addition the senior citizen is eligible to receive complete medical and surgical care, hospital care, drugs, dental care and also artificial limbs, eyes, hearing aids and other needed appliances, nurses' services and ambulance service.
3. Division for Children. This Section relates to providing aid to dependent children, child welfare service and services for crippled children of welfare families. This includes all dependent children under the age of 16 years or 18 years, if regularly attending

school. Such aid is granted in such amount as will supplement other income of the family to provide dependent child or children with reasonable subsistence compatible with decency and health. To be eligible for aid the child must be a resident of the state for one year and whose parents or relatives have been a resident of the state the last year.

4. Division for the Blind. Certain services for the blind include those with seriously impaired visions or persons suffering from conditions which might lead to blindness. This will include medical or surgical treatment for which he is unable to pay. Hospital care and any other necessary expenses for restoring eyesight or preventing blindness. This Division also provides vocational aid in training to the blind cooperating in this respect with the Division of Vocational Rehabilitation. Assistance shall be granted under this act to applicants who are 21 years of age or over who has reached his sixteenth birthday and is found not to be acceptable for education in the state school for the blind and a resident of the state for 5 years.

**Referrals:** All cases should be referred to the County Welfare Department.

**Cost:** None, if recipient is eligible for service.

**Area:** State wide.

**Local Representative:**

**Address:**

**Telephone Number:**

## WASHINGTON STATE DIVISION OF VOCATIONAL REHABILITATION

E. M. Oliver, Supervisor  
Capitol Building  
Post Office Box 97  
Olympia, Washington

Services:

- I. Who is eligible for rehabilitation service? Any person with a disablement which constitutes the permanent vocational handicap providing the service will result in remunerative employment. The disablement must be certified to by a licensed physician or a medical form provided by the Division of Vocational Rehabilitation. All applications must be approved by the State Supervisor and the minimum age is 16 years.
- II. What services are available?
  - A. Consultation and guidance aided by medical care and applies to any disability, accident, or disease, the deaf, or hard of hearing, heart trouble or any other chronic disease who would after assistance have a reasonable chance of employment.
  - B. A complete training program.
  - C. Aid in securing employment.
  - D. Artificial appliances.
  - E. Physical and mental restoration.
- III. What are the types of training facilities?
  - A. There are no educational requirements.
  - B. Training may be given on the job, in school, by a tutor or by correspondence.
  - C. Training may be given in any type of work.
- IV. What training assistance may be provided?
  - A. Tuition and fees of all approved training institutions.
  - B. Books and supplies for training on the basis of economic need.
  - C. Maintenance including board and room.
  - D. The cost of "on the job training".

Write: For application form to state office or district counselor, 1503 Fourth and Cherry Building, Seattle; 507 Hutton Building, Spokane; 210 Liberty Building, Yakima, Washington.

Referrals: Return application blank to above office nearest your area.

Cost: Based entirely on need.

Local Representative:

Address:

Telephone Number:

## WASHINGTON STATE ANTI-TUBERCULOSIS ASSOCIATION

Mr. George Shahan, Executive Secretary  
918 Terminal Sales Building  
Seattle, Washington

**Service:** There is a tuberculosis association in each county in the state which has its own board of directors. The county units carry on their own respective programs. The association conducts health programs in the schools and of a general nature for the public. The associations conduct tuberculosis testing in the schools and follow up for positive reactors. Arrangements should be made through these associations for obtaining the state mobile x-ray unit. This x-raying is done in groups usually requiring a hundred persons for each group. Hospitalization of those having tuberculosis is arranged by the association with state and local sanitoria. The associations also assist in maintaining a rehabilitation service to enable those who have recovered from tuberculosis to secure training for suitable vocations. Local associations are available for conferences on all community health problems. They will provide speakers and appropriate films for any group meetings. They can provide you with a list of hospitals and county sanitoria.

**Referrals:** Contact local association leaders first. For any educational information write the Executive Secretary.

**Cost:** None.

**Area:** State wide.

**Local Representative:**

**Address:**

**Telephone Number:**

## WASHINGTON DIVISION OF AMERICAN CANCER SOCIETY

Mrs. R. E. Mosiman, State Commander  
Medical Arts Building  
1117 Second Avenue  
Seattle 1, Washington

**Services:** There is a county cancer organization in most of the counties in the state. See reverse side for sponsoring organizations and county representatives. The purpose of these chapters is to conduct an annual campaign of lay education of cancer control with special emphasis given to symptoms, diagnostic treatment and prevention of cancer. They will furnish pamphlets to you upon request. They supply films and speakers for meetings in the interest of cancer education and assist in obtaining the State Department of Health and the Department of Public Welfare. In many localities assistance is given to needy cancer patients and provide transportation funds to clinics (health) on cancer. Local funds determine the amount of services that can be rendered.

**Referrals:** The family physician should refer cases to local cancer organization.

**Treatment:** The Cancer Society does not pay for hospitalization or medical service. However, they arrange for treatment of indigent patients through the Department of Public Welfare.

**Cost:** None as the services rendered are primarily educational.

**Area:** State wide as information is not available locally. Write to the State Executive Secretary.

**Local Representative:**

**Address:**

**Telephone Number:**

NATIONAL FOUNDATION OF INFANTILE PARALYSIS  
Warren T. Kingsbury, State Representative  
430 Central Building  
Seattle, Washington

**Services:** There is a chapter in every county in the state operating a polio program. The county chapter renders aid to needy Infantile Paralysis sufferers, irrespective of age, race or creed. They pay all or any part of hospital costs, salaries of special and general nurses and physical therapy, pay professional workers for the care of the patient, provide treatment and fee for medical care including diagnosis and consultations, medical and surgical treatment, laboratory services, supply educational literature, other materials for local groups, provide scholarships for training for physical therapy encouraging young men and women to enter this field. Render aid in time of epidemic.

**Referrals:** Should there be any person recently stricken with polio or a person stricken in former years, such individual, if in need of assistance, should contact the local county chairman.

**Area:** State wide. Services rendered through local chapter.

**Local Representative:**  
**Address:**  
**Telephone Number:**

WASHINGTON SOCIETY FOR MENTAL HYGIENE  
George F. Ault, Executive Secretary  
408 Seaboard Building  
Seattle 1, Washington

**Services:** The Washington Society for Mental Hygiene is a state wide organization composed of people in every community who are actively interested in the prevention and treatment of mental illnesses. The purpose of the society is educational. It accomplishes this by institutes, lectures, and distribution of pamphlet material. The organization does not offer treatment services but provides information about proper private and public facilities in this field. It acts as a clearing house and coordinator for mental hygiene in other community agencies and civic groups.

The society's expanded program of education and coordination is designed to understand and meet the emotional as well as the mental needs of rejected servicees and veterans. Continued efforts are also being made to improve facilities for care and treatment of mental disorders and defects in the state and county hospitals and institutions.

**Referrals:** Request for educational material or questions regarding mental hygiene problems can be directed to the state office.

**Cost:** None.

**Area:** State wide. There is a county unit being planned for each county in the state.

**Local Representative:**

**Address:**

**Telephone Number:**

## WASHINGTON STATE SOCIAL HYGIENE ASSOCIATION

Miss Honoria Hughes  
6147 Arcade Building  
Seattle 1, Washington

**Services:** There is a local chapter in nearly every county of the state. The purpose of these chapters are to combat syphilis and gonorrhea and conditions which favor their spread.

1. By promoting effective repression of commercialized prostitution.
2. By promoting effective repression of those conditions which permit their causes and spread venereal disease.
3. By promoting education on sex conduct. The local associations work with other agencies and individuals who have a responsibility in the control of venereal disease. Their principle function, however, is supplying educational material for guiding public opinion toward eradication of conditions which cause the spread of venereal disease.

**Referrals:** A list of educational material can be supplied either through the local or state organization.

**Cost:** None. Certain material supplied principally for educational needs.

**Area:** State wide with services rendered through local organizations or state headquarters.

AMERICAN RED CROSS  
905 Second Avenue Building  
Seattle, Washington

**Service:** Provides disaster relief and emergency financial assistance to servicemen, disabled ex-servicemen and their dependents, able-bodied ex-servicemen during the period of adjustment to civilian life pending receipt of government benefits. Assists with applications for dependency allowances and offers claims service, including assistance with death benefits; secures information for emergency furloughs and discharges; provides liaison communication between servicemen and their families. Offers training in nutrition, home nursing, first aid, water safety, and home and farm accident prevention under specially qualified instructors.
